INTRODUCTION:

This report has be prepared by the Manitoba Bureau of Statistics (MBS) as part of its economic statistics program. Its purpose is to provide information for Manitoba on the importance and impact of trade at both the interprovincial and international levels.

This publication provides trade data for the United States by U.S.A. census subdivision, commodity, and industry. The information on international trade is from Statistics Canada's External Trade Division for which MBS has adjusted the valuation for the major grains and oilseeds to more closely reflect their actual value to Manitoba. In addition, the volume and value of oil exports has been adjusted to balance with interprovincial exports and domestic production levels.

Users should be aware that from 1985 forward all export data is on a province of origin basis. In addition, users are cautioned that the import data for all years is on a province of clearance basis. The clearance data represents only imports which are cleared through Manitoba custom ports. Therefore, there may be some imports from the United States which are not counted as they are cleared through custom ports in other provinces and then shipped to Manitoba (MBS would count these as interprovincial imports). This implies that trade balances calculated for individual U.S.A. census subdivision would, in all likelihood, overstate Manitoba's actual position.

The Manitoba Bureau of Statistics has available additional detailed information which can be supplied to interested users on a cost recovery basis. For answers to any questions or for further information, please contact Roy Ellis at MBS (204-945-2994).

DATA HIGHLIGHTS:

In 1987, Manitoba's exports to the United States were $1513 million, an increase of 15.5 percent over 1986. Manitoba's imports from the United States in 1987 were $2612 million.

Two census subdivisions accounted for almost 59 percent of Manitoba's exports. They were Minnesota, North Dakota, and South Dakota which represented 32.7 percent of Manitoba's exports and Illinois, Indiana and Wisconsin which accounted for 26.1 percent.

Manufacturing industries represented 78.8 percent, or $1192 million of Manitoba's exports to the United States in 1987. Within manufacturing electrical and electronic product industries and transportation equipment industries accounted for 16.7 and 15.3 percent of total exports respectively.

Imports of manufactured goods were $2429 million, or 93.0 percent of all imports from the United States in 1987.

In terms of commodity exports the largest growth in 1987 was end products, which rose to $709 million, over a sixty percent increase from the 1986 level of $442 million.
